Hi Greg Can you resend the Excel spreadsheets ? Apparently the files are corrupt with the originals. We have been able to review, but can seem to enter them into our records management system.

Hi Ravi,

Is it possible get a different copy of the 4 Excel spreadsheets you attached in this email request you sent us?

They are corrupt files and we haven't been able to successfully convert them to PDF so they can be properly uploaded to SEMS.

Thanks,

Jack

Ravi, apologies for not letting you know sooner on these changes.

First, note that the value for PCBs is 31 ug/kg (as shown in the Executive Summary and Table 6-1) rather than 32 ug/kg (as shown in the Section 6 text). This is a typo that has been corrected in the attached PDF file.

Three things changed the total PCBs and arsenic values slightly during the final QC and review process.

1. We performed final QC of the USGS percent fines data. In that process, we updated some percent fines sample values based on a correspondence with Kathy Conn last month. We were previously pulling from a database file provided by USGS, but Kathy pointed us to Table 2 in [Suspended-Sediment Transport from the Green-Duwamish River to the Lower Duwamish Waterway, Seattle, Washington, 2013–17 \(usgs.gov\)](#) which contained final summarized percent fines data, which differed slightly from the database for several samples.
2. We performed the final ProUCL runs on the final dataset and selected statistical treatments that could be consistently applied to the UCLs and UTLs. The notes to Table 6-1 have additional details on the statistical treatments selected.
3. We rounded to 2 digits.

Let us know if you would like to discuss further.

Greg

Hi Dan We need the word version and the spreadsheet. Can we set up a quick call today before 2 to discuss why the numbers changes from 29.3 and 19.3 to 32 and 20 for PCBs and As ?

Ravi, do you also want word and excel files for the memo, or will you be making comments in the pdf or in a letter/table format?

Thanks

Dan

Ravi,

Attached is the draft East Waterway Anthropogenic Background Evaluation Memo. I believe you said you would forward to others for review. Please let us know if you need anything else and when you think you may have comments back for us.

Thanks

Dan
